Acknowledgement of Country

Bemin Secondary College respectfully acknowledges the Bunurong People of the Kulin Nation, who are the Traditional Owners of the land on which Bemin Secondary College is located in Melbourne’s west, and pay respect to their Elders past, present and emerging.

WELCOME TO YEAR 9

Joanne Camozzato
College Principal

The Bemín Secondary College Year 9 Program allows students to further explore their key areas of interests. It is designed to both supplement and extend our students so that they are challenged to develop a further understanding of their strengths and learning areas they wish to know more about. It is important that students maintain an element of curiosity and take the opportunity to try something new. The elective program at Year 9 aims to enthuse students and maintain their love of learning as they enter further into adolescence. A key time for students, Year 9 is marked by significant social, emotional and cognitive development. As they navigate changes in decision-making, motivation and engagement as a College we believe it is crucial to provide programs that support to help them thrive.

At Bemín Secondary College, the Year 9 Program recognises these unique needs by providing students with agency in their learning, offering choice and control through the electives program.

Elyshia Sheldon
Assistant Principal
Junior School

Year 9 is an important milestone for students in secondary school as they begin considering their future pathways in senior secondary and post-secondary life.

Acknowledging this, Bemín Secondary College's Year 9 Program has been created with the theme of action in mind. It is designed for students to engage and interact with various curricular and extra-curricular opportunities, and to choose tailored electives that reflect their own interests and goals.

The program builds on the strong foundations established in Years 7 and 8, calling on students to take ownership of their learning as they begin preparing and planning for their future. It calls on them to think individually, locally and globally as they continue developing as students and citizens.

YEAR 9 PROGRAM

Year 9 at Bemín Secondary College is a time for growth, challenge and discovery.

Our program is designed to support students in building positive relationships, engaging in social justice initiatives, and developing personal responsibility. Students will continue to strengthen their academic skills in core subjects while also having the opportunity to explore their interests through a wide range of elective choices. Importantly, the Year 9 experience extends beyond the classroom, providing opportunities for leadership, resilience and self-discovery.

Core Structure

All Year 9 students will study the following core subjects across the year:

- English
- Mathematics
- Humanities
- Science
- Health & Physical Education
- Careers and Pathways

In addition, all students participate in Challenge Experiences, which include the Wyndham Tech School partnership and the Year 9 City Experience program. These provide valuable opportunities to learn beyond the classroom, develop independence, and embrace new challenges.

Electives

Alongside their core studies, students will select **two electives** each semester.

- Students must choose **at least one Arts elective and one Technology elective** during the year.
- The remaining elective choices may be drawn from any of the available subject areas, allowing students to personalise their learning pathway and explore their interests.

Electives cover a diverse range of curriculum areas such as Visual Arts, Performing Arts, Music, Food Technology, Digital Technologies, Design, Sport and more.

Advanced Mathematics

In Year 9, students who enjoy Mathematics and are seeking additional challenge may nominate for Advanced Mathematics as part of their elective program. This is studied in addition to their core Mathematics class. Advanced Mathematics 1 may be completed in Semester 1 or Semester 2.

Advanced Mathematics 1 provides additional depth, challenge and extension. Students who successfully complete it may choose Advanced Mathematics 2 in Semester 2; Advanced Mathematics 2 is optional. The sequence supports pathways into Year 10 Pre-Methods and VCE Mathematical Methods. Entry is based on teacher recommendation, assessment results and demonstrated commitment to learning.

EXAMPLE: A typical Year 9 learning program at Bemín Secondary College

Core Subjects								Electives Students must complete at least one Arts elective and one Technology elective during the year	
Semester 1	English 9 periods per fortnight	Maths 9 periods per fortnight	Humanities 6 periods per fortnight	Science 6 periods per fortnight	Health 2 periods per fortnight	Physical Education 4 periods per fortnight	Careers and Pathways 2 periods per fortnight	Elective 6 periods per fortnight	Elective 6 periods per fortnight
Semester 2								Elective 6 periods per fortnight	Elective 6 periods per fortnight

ELECTIVES

Year 9 students at Bemín Secondary College select from a wide range of elective subjects, allowing them to explore their interests, develop new skills and apply their learning in practical and engaging contexts.

Students are strongly encouraged to make subject selections in consultation with their teachers, their family and the Junior School team, balancing challenge and accessibility for students across all ability levels.

Students need to choose **six elective subjects across the year** (three each semester). Students must complete **at least one arts-based and one technology-based subject** as part of their selection.

THE ARTS

From Studio to Gallery

ARTS

OVERVIEW

In this Visual Arts elective, students take their creative ideas from the sketchbook to the exhibition wall. The subject is perfect for students who enjoy exploring artistic styles, experimenting with materials, and expressing themselves through visual art.

WHAT YOU WILL DO

Students will build skills in painting and drawing while studying art movements such as Impressionism and Expressionism. They will also create a whimsical clay house inspired by Antonio Gaudí, working through the studio process from concept development to final artwork.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Art Creative Practice, Art Making and Exhibiting, Visual Communication Design, Media
- Vocational Major (VM): Creative and Applied Learning projects with an arts focus
- VET Studies: Visual Arts, Creative and Digital Media

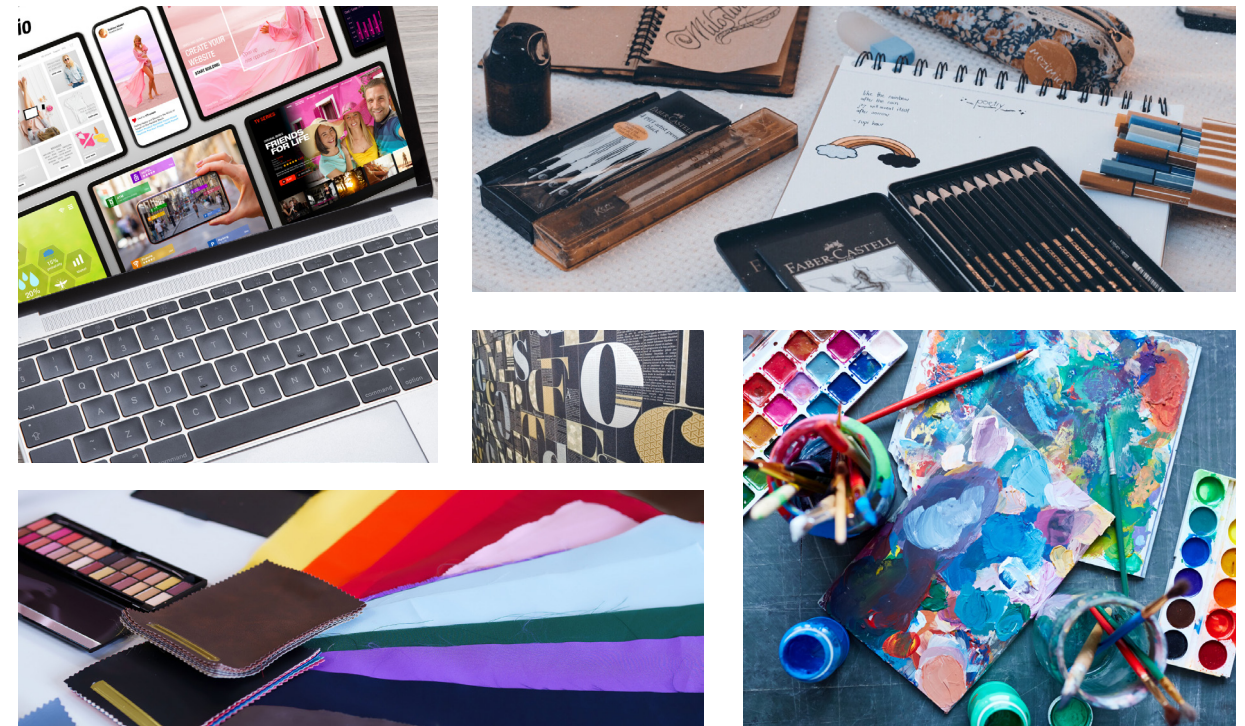

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Visual arts and design
- Architecture and interior design
- Media and communication
- Creative industries and cultural enterprises

Creative Communications

ARTS

OVERVIEW

In this Visual Communication Design elective, students are introduced to the creative world of design through hands-on, project-based learning. The subject is perfect for students who enjoy drawing, problem-solving, and expressing ideas visually.

WHAT YOU WILL DO

Students will follow the design process to create projects such as a stamp design, a music poster, and a food truck branding concept. They will learn technical drawing, use both manual and digital methods, and explore typography and layout to present creative solutions.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Visual Communication Design, Media, Art Creative Practice, Art Making and Exhibiting
- Vocational Major (VM): Creative and Applied Learning projects with a design focus
- VET Studies: Creative and Digital Media, Visual Arts

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Graphic and digital design
- Advertising and marketing
- Architecture and product design
- Media and communication

Draft, Cut, Release

ARTS

OVERVIEW

In this Media elective, students become creators, critics, and storytellers in the world of film, television, social media, and digital content. The subject is perfect for students who enjoy working with media, technology, and creative storytelling.

WHAT YOU WILL DO

Students will analyse popular media and uncover hidden messages in ads and films. They will also create their own projects such as short films, podcasts, trailers, and photo stories – building real-world skills in scriptwriting, production, and editing.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Media, Visual Communication Design, English, Literature
- Vocational Major (VM): Creative and Applied Learning projects with a media focus
- VET Studies: Creative and Digital Media, Music

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Film and television production
- Journalism and digital media
- Advertising and marketing
- Content creation and communication industries

Page to Stage

ARTS

OVERVIEW

In this Drama elective, students explore how to transform scripts into engaging performances. The subject is ideal for those who enjoy acting, teamwork, and creative self-expression, whether they are experienced performers or just starting out.

WHAT YOU WILL DO

Students will work in groups to interpret scripts, develop characters, and apply acting techniques to bring scenes to life. They will also prepare and perform a monologue, drawing on both classical and contemporary texts, including creative takes on Shakespeare.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Drama, Theatre Studies, Literature, English
- Vocational Major (VM): Creative and Applied Learning projects with a performance focus
- VET Studies: Creative and Digital Media, Music

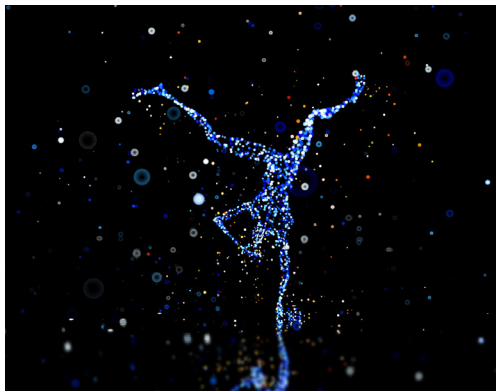

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Performing arts and theatre
- Film, television, and media
- Communication and public speaking
- Education and community arts

Make Your Move

ARTS

OVERVIEW

In this Dance elective, students build their skills in movement, technique, and performance while exploring dance as a form of creativity and cultural expression. The subject is perfect for students who enjoy performing, working in teams, and expressing themselves through movement.

WHAT YOU WILL DO

Students will experience a variety of dance styles, investigate the cultural significance of dance, and learn safe dance practices. The elective culminates in a choreographic project where students work together to create and perform their own routine.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Dance, Drama, Theatre Studies, Physical Education
- Vocational Major (VM): Creative and Applied Learning projects with a performance focus
- VET Studies: Dance, Music, Community Services

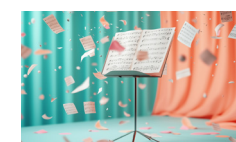

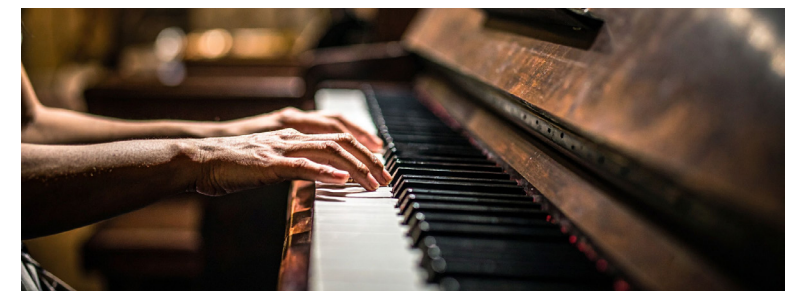

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Performing arts and choreography
- Health, fitness, and wellbeing industries
- Education and community arts
- Event and entertainment industries

Sound Explorations

ARTS

OVERVIEW

In this Instrumental Music elective, students develop their skills as both performers and musicians. The subject is ideal for students who are passionate about music, enjoy learning an instrument, and want to explore creativity through sound.

WHAT YOU WILL DO

Students will choose an instrument such as guitar, ukulele, or keyboard and receive guided instruction to improve their technique. They will also build knowledge of music theory, develop critical listening skills, and perform individually and in ensembles.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Music (Contemporary Performance, Music Inquiry, Composition and Sound Production)
- Vocational Major (VM): Creative and Applied Learning projects with a music focus
- VET Studies: Music

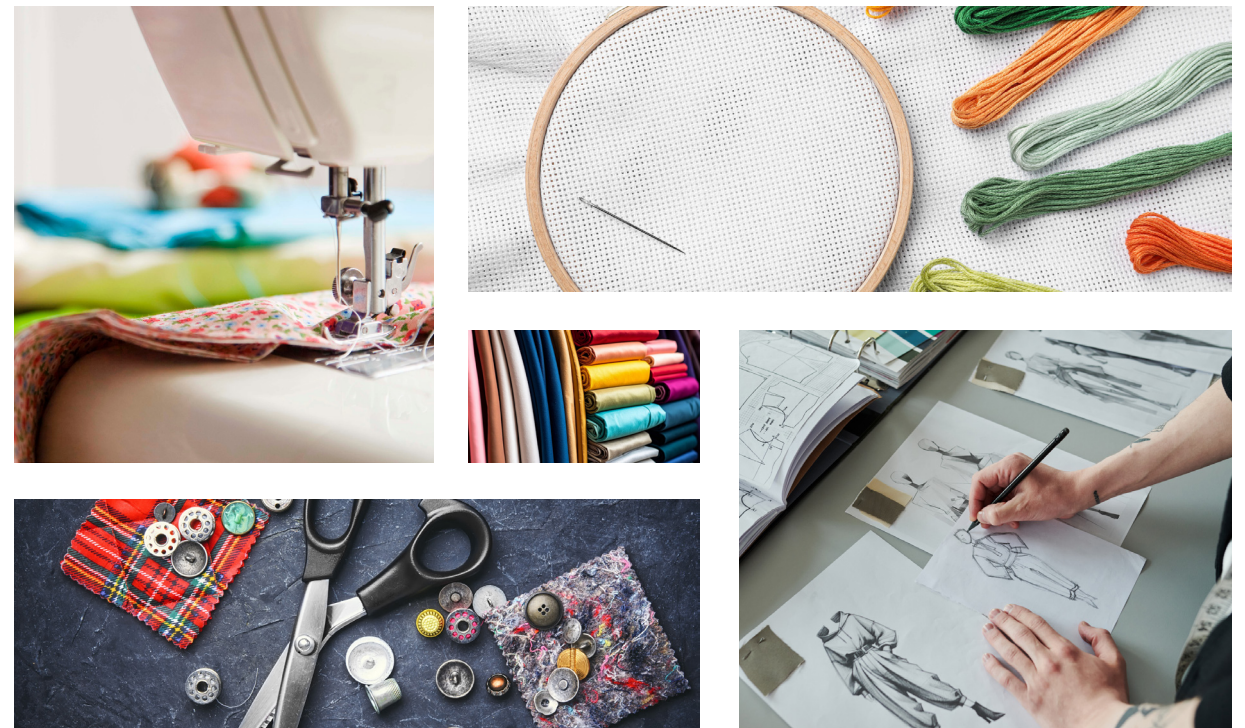

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Music performance and composition
- Sound engineering and production
- Creative industries and entertainment
- Education and community arts

TECHNOLOGIES

Stitch and Style TECHNOLOGY

OVERVIEW

In this Textiles elective, students explore the creative and practical world of fabric design. The subject is perfect for students who enjoy hands-on making, problem-solving, and expressing themselves through design.

WHAT YOU WILL DO

Students will experiment with techniques such as hand sewing, embroidery, and machine sewing. They will respond to design briefs, plan creative projects, and develop technical skills to produce their own textile products.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Product Design and Technology, Visual Communication Design, Art Creative Practice
- Vocational Major (VM): Creative and Applied Learning projects with a design or enterprise focus
- VET Studies: Apparel, Fashion and Textiles, Visual Arts

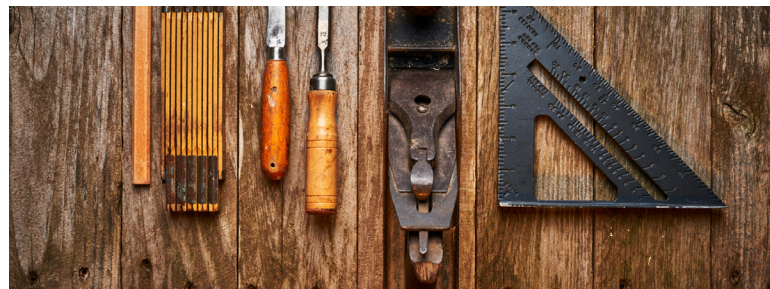

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Fashion and textile design
- Costume and theatre production
- Interior design and soft furnishings
- Creative industries and entrepreneurship

Crafted in Timber

TECHNOLOGY

OVERVIEW

In this Design Technology elective, students explore the design and construction of timber products. The subject is perfect for students who enjoy working with their hands, solving problems, and bringing creative ideas to life.

WHAT YOU WILL DO

Students will learn safe use of tools, machines, and equipment while applying the design process to create functional and decorative projects. They will develop practical woodworking skills, from measuring and cutting to finishing, as they design and produce their own timber products.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Product Design and Technology (Wood/Materials), Visual Communication Design
- Vocational Major (VM): Creative and Applied Learning projects with a design or construction focus
- VET Studies: Furnishing, Building and Construction

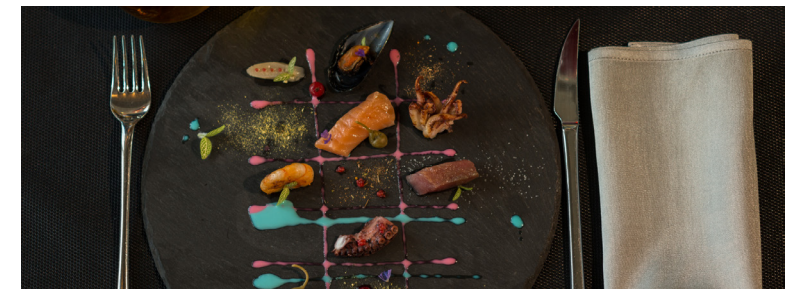

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Furniture and cabinet making
- Building and construction trades
- Industrial design and product development
- Creative industries and entrepreneurship

Food, Glorious Food

TECHNOLOGY

OVERVIEW

In this Food Technology elective, students explore the art of food design, presentation, and styling. The subject is perfect for students who enjoy cooking, being creative, and experimenting with how food can impress an audience.

WHAT YOU WILL DO

Students will learn industry techniques for creating visually appealing dishes while completing two major projects: an Afternoon Tea and a Fine Dining experience. They will choose recipes, plate meals creatively, photograph their work, and research Australian chefs and food innovators.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Food Studies, Health and Human Development, Business Management
- Vocational Major (VM): Creative and Applied Learning projects with a hospitality or enterprise focus
- VET Studies: Hospitality

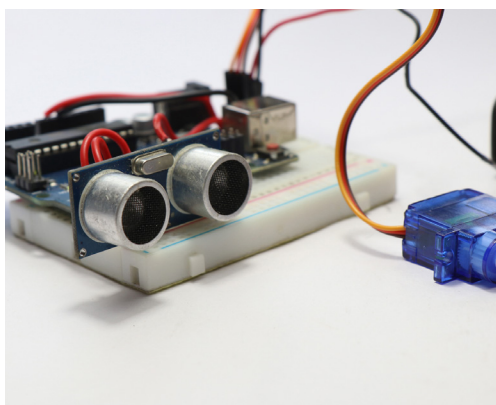

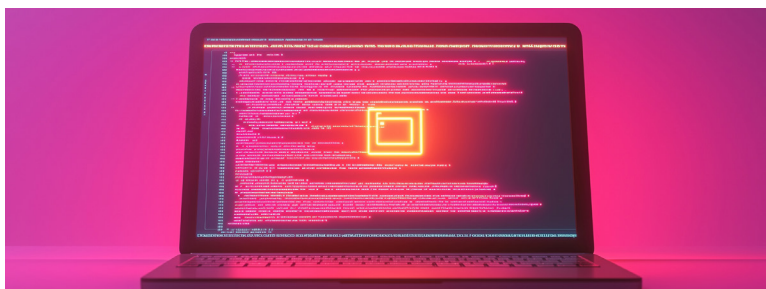

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Hospitality and catering
- Food styling and photography
- Nutrition and health industries
- Culinary arts and entrepreneurship

Next Gen Creators

TECHNOLOGY

OVERVIEW

In this Digital Technologies elective, students step into the world of digital innovation, design, and creativity. The subject is perfect for those who enjoy experimenting with technology, problem-solving, and creating interactive digital experiences.

WHAT YOU WILL DO

Students will design and develop projects such as custom game worlds, digital artworks, smart robotics challenges, and interactive concepts. They will use tools like Godot, Unreal Engine, and programmable robotics to create, test, and showcase their own ideas.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Applied Computing, Media, Visual Communication Design
- Vocational Major (VM): Creative and Applied Learning projects with a digital or enterprise focus
- VET Studies: Creative and Digital Media, Information and Communications Technology, Integrated Technologies

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Game and app development
- Digital design and animation
- Robotics and engineering
- Creative industries and technology entrepreneurship

ENGLISH

Lit Lab

ENGLISH

OVERVIEW

Ever wondered how writers create meaning in a novel or play? Lit Lab is an English extension elective for students who enjoy reading, writing, and exploring texts in greater depth. You'll investigate how writers use character, theme, language, symbolism, and structure to shape meaning through close reading, discussion, analytical writing, and creative responses. Develop the skills to explore complex ideas and confidently form and justify your own interpretations.

Entry Requirements: Due to the academic nature of this course, students should demonstrate strong achievement in English and receive a recommendation from their English teacher.

WHAT YOU WILL DO

Students will study a contemporary novel and Shakespearean play through close reading, discussion, creative responses, and analytical writing. They

will explore how writers use language and literary techniques to shape meaning, while developing confidence in forming and defending their own interpretations.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: English, Literature, English Language
- Vocational Major (VM): Applied Learning projects with a literacy and communication focus
- VET Studies: Creative and Digital Media, Business

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Writing, publishing, and journalism
- Media and communication
- Education and research
- Creative industries

War of Words

ENGLISH

OVERVIEW

In this English elective, students sharpen their debating and public speaking skills while mastering the art of persuasion. The subject is perfect for students who enjoy discussing big ideas, presenting their views, and learning how to win an argument with confidence.

WHAT YOU WILL DO

Students will build persuasive arguments, practise public speaking, and engage in debates on a range of current and topical issues. Along the way, they will develop critical thinking, improve research techniques, and learn how to rebut opposing views effectively.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: English, Literature, English Language, Legal Studies
- Vocational Major (VM): Applied Learning projects with a literacy and communication focus
- VET Studies: Creative and Digital Media, Business

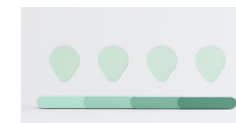

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Law, politics, and public service
- Journalism and media
- Business, leadership, and marketing
- Education and communication

THE HUMANITIES

Defining Moments HUMANITIES

OVERVIEW

In this History elective, students explore key events that have profoundly shaped the modern world. The subject is ideal for students who are fascinated by the past and want to understand how social, political, and technological changes impact humanity.

WHAT YOU WILL DO

Students will investigate major historical events such as the bombing of Hiroshima and the COVID-19 pandemic. Through discussions and activities, they will analyse causes and consequences, debate positive and negative outcomes, and reflect on how these defining moments continue to shape our lives today.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: History, Global Politics, Sociology, Legal Studies
- Vocational Major (VM): Applied Learning projects with a humanities or community focus
- VET Studies: Community Services, Business, Creative and Digital Media

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Law, politics, and international relations
- Research and education
- Journalism and media
- Community and cultural organisations

People, Power and Process

HUMANITIES

OVERVIEW

In this Civics and Citizenship elective, students examine how political and legal systems shape Australia's democracy. The subject is perfect for students who are curious about politics, law, justice, and the processes that influence decision-making in society.

WHAT YOU WILL DO

Students will explore how governments are formed, how laws are made, and how citizens can influence change. They will investigate current political and legal issues, debate different perspectives, and take part in practical activities that bring democracy and justice to life.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Legal Studies, Global Politics, History, Sociology
- Vocational Major (VM): Applied Learning projects with a humanities or community focus
- VET Studies: Business, Community Services, Creative and Digital Media

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Law, politics, and public service
- Business and leadership
- Journalism and media
- Community and advocacy organisations

Boss Moves

HUMANITIES

OVERVIEW

In this Economics and Business elective, students learn how money works, how businesses make decisions, and how consumers and entrepreneurs shape the economy. The subject is ideal for students who are curious about business, finance, and real-world problem-solving.

WHAT YOU WILL DO

Students will explore how people and companies buy, sell, and trade, while also developing their own business ideas. Through hands-on activities and case studies, they will build skills in budgeting, teamwork, and decision-making, with a focus on being smart consumers and future entrepreneurs.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Business Management, Economics, Accounting, Legal Studies
- Vocational Major (VM): Applied Learning projects with an enterprise or commerce focus
- VET Studies: Business, Community Services

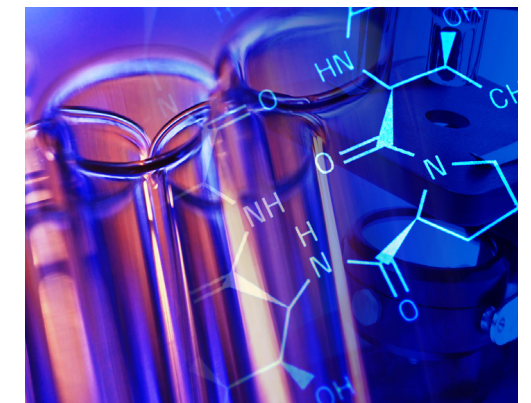

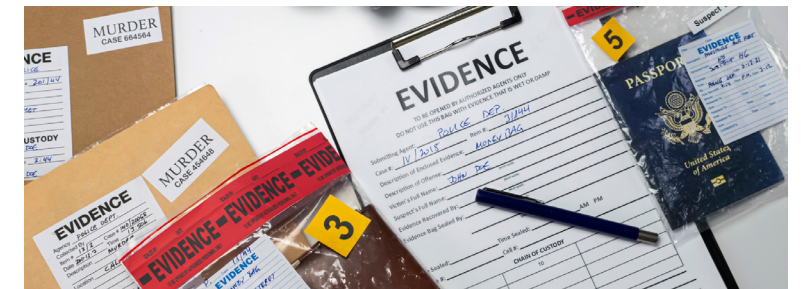

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Business and entrepreneurship
- Finance, accounting, and economics
- Marketing and management
- Community and enterprise organisations

SCIENCE

Forensics Toolkit SCIENCE

OVERVIEW

In this Science elective, students explore how biology, chemistry, and physics come together to solve mysteries. The subject is perfect for students who are curious about crime-solving, evidence, and the role of science in the courtroom.

WHAT YOU WILL DO

Students will investigate the history and modern applications of forensics while learning practical techniques used by real forensic scientists. They will gather and analyse evidence, interpret data, and apply scientific thinking to crack cases like a true detective.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Biology, Chemistry, Physics, Psychology, Legal Studies
- Vocational Major (VM): Applied Learning projects with a science or community focus
- VET Studies: Laboratory Skills, Health, Community Services

Career Pathways

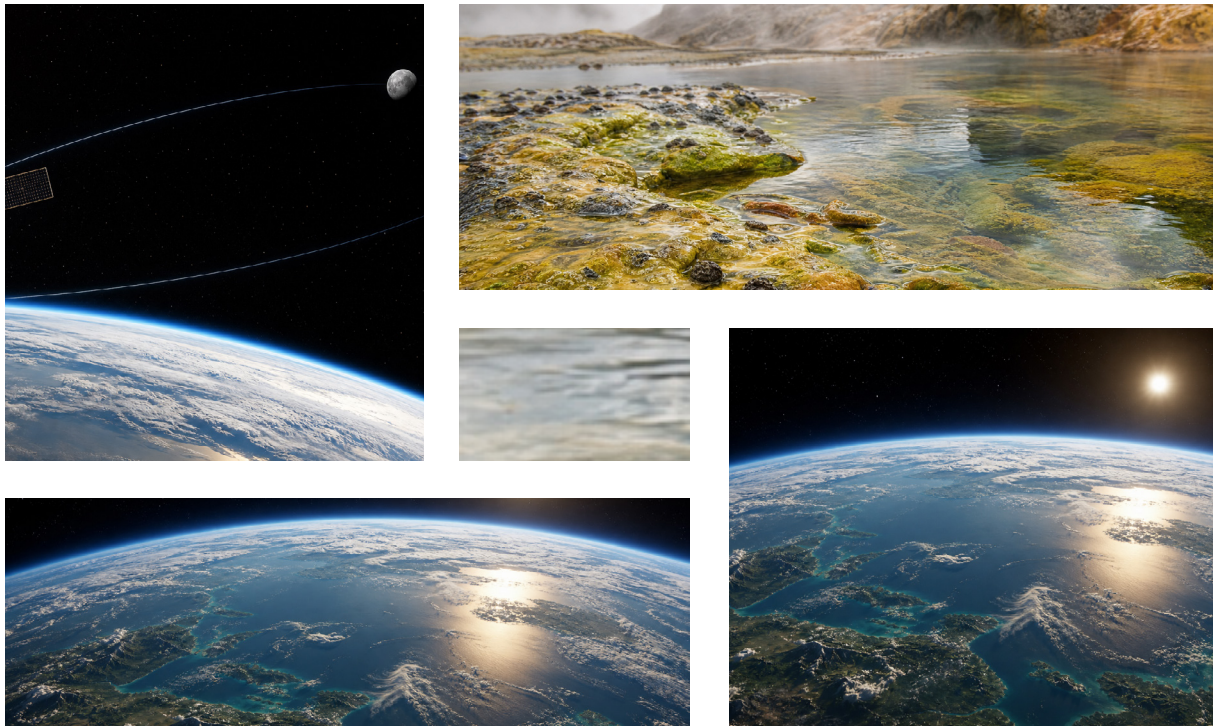

It also develops transferable skills valuable for future career pathways in areas such as:

- Forensic science and criminology
- Medicine, nursing, and health sciences
- Laboratory and research fields
- Law enforcement and legal careers

Cosmic Forces and Elements

SCIENCE

OVERVIEW

In this Science elective, students investigate the conditions that allow planets to sustain life. Drawing on biology, chemistry, physics, and Earth and space science, they will compare planetary environments and make evidence-based conclusions about how life might differ if Earth's conditions changed.

WHAT YOU WILL DO

Students will explore planetary spheres and the abiotic and biotic factors needed for life, examine why water is essential, and investigate how species adapt to survive. They will apply Newton's Laws to space travel and planetary orbits, then use their understanding of light and spectra to infer the chemical composition of distant planets.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Biology, Chemistry, Physics, Environmental Science, Geography
- Vocational Major (VM): Applied Learning projects with a science, sustainability, or technology focus
- VET Studies: Laboratory Skills, Engineering Studies, Conservation and Ecosystem Management

Career Pathways

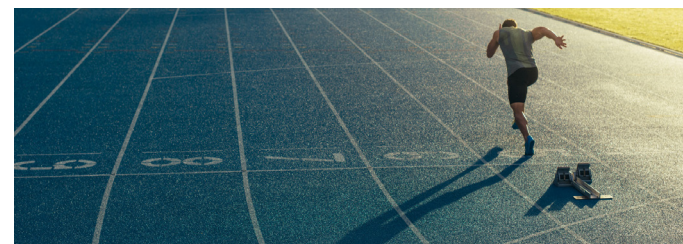

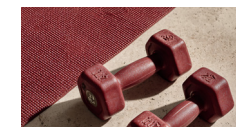

It also develops transferable skills valuable for future career pathways in areas such as:

- Astronomy, astrophysics, and space science
- Aerospace engineering and satellite technology
- Environmental science, astrobiology, and geoscience
- Scientific research and data analysis

HEALTH & PHYSICAL EDUCATION

Peak Performance HEALTH & PHYSICAL EDUCATION

OVERVIEW

In this Health and Physical Education elective, students uncover how the body moves, learns, and performs through the lens of sports science. The subject is ideal for students interested in fitness, strategy, and improving their own performance in sport and physical activity.

WHAT YOU WILL DO

Students will study biomechanical principles, practise fundamental movement skills, and explore strategies through game planning and performance analysis. They will also investigate the body's energy systems and take part in fitness testing labs to see science in action.

PATHWAYS

Senior School Pathways

This subject provides a strong foundation for senior school studies in:

- VCE: Physical Education, Health and Human Development, Biology
- Vocational Major (VM): Applied Learning projects with a health, wellbeing, or sport focus
- VET Studies: Sport and Recreation, Health

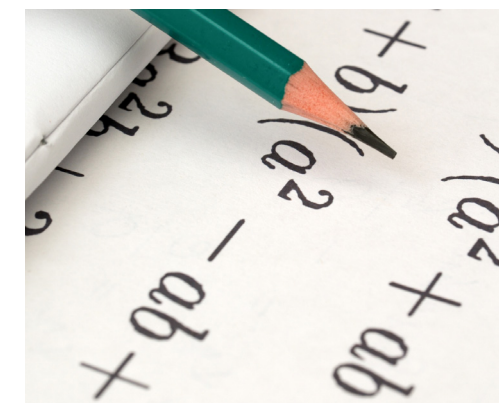

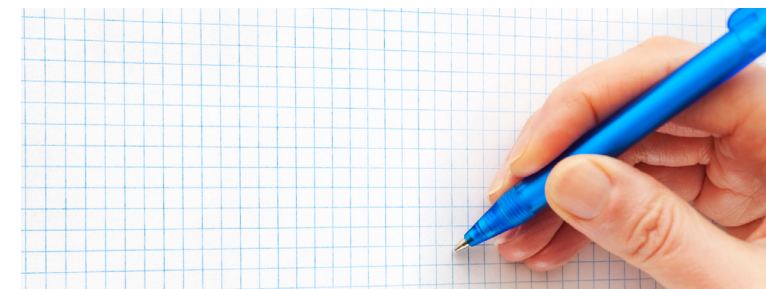

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Sports science and exercise physiology
- Coaching and personal training
- Health and allied health professions
- Education and recreation industries

MATHEMATICS

Advanced Mathematics MATHEMATICS

Advanced Mathematics 1 is a prerequisite for Advanced Mathematics 2. Advanced Mathematics 2 is optional.

OVERVIEW

The Advanced Mathematics elective is designed for Year 9 students who enjoy mathematics and are seeking additional challenge and extension beyond the core curriculum. Students may choose to complete Advanced Mathematics 1 in either Semester 1 or Semester 2. Advanced Mathematics 2 is offered in Semester 2 and is optional; students wishing to undertake it must first successfully complete Advanced Mathematics 1.

WHAT YOU WILL DO

Students will develop advanced mathematical thinking, problem-solving, algebraic reasoning and analytical skills. The course strengthens their mathematical foundations and supports future success in Year 10 Pre-Methods, with pathways leading into VCE Mathematical Methods.

PATHWAYS

Senior School Pathways

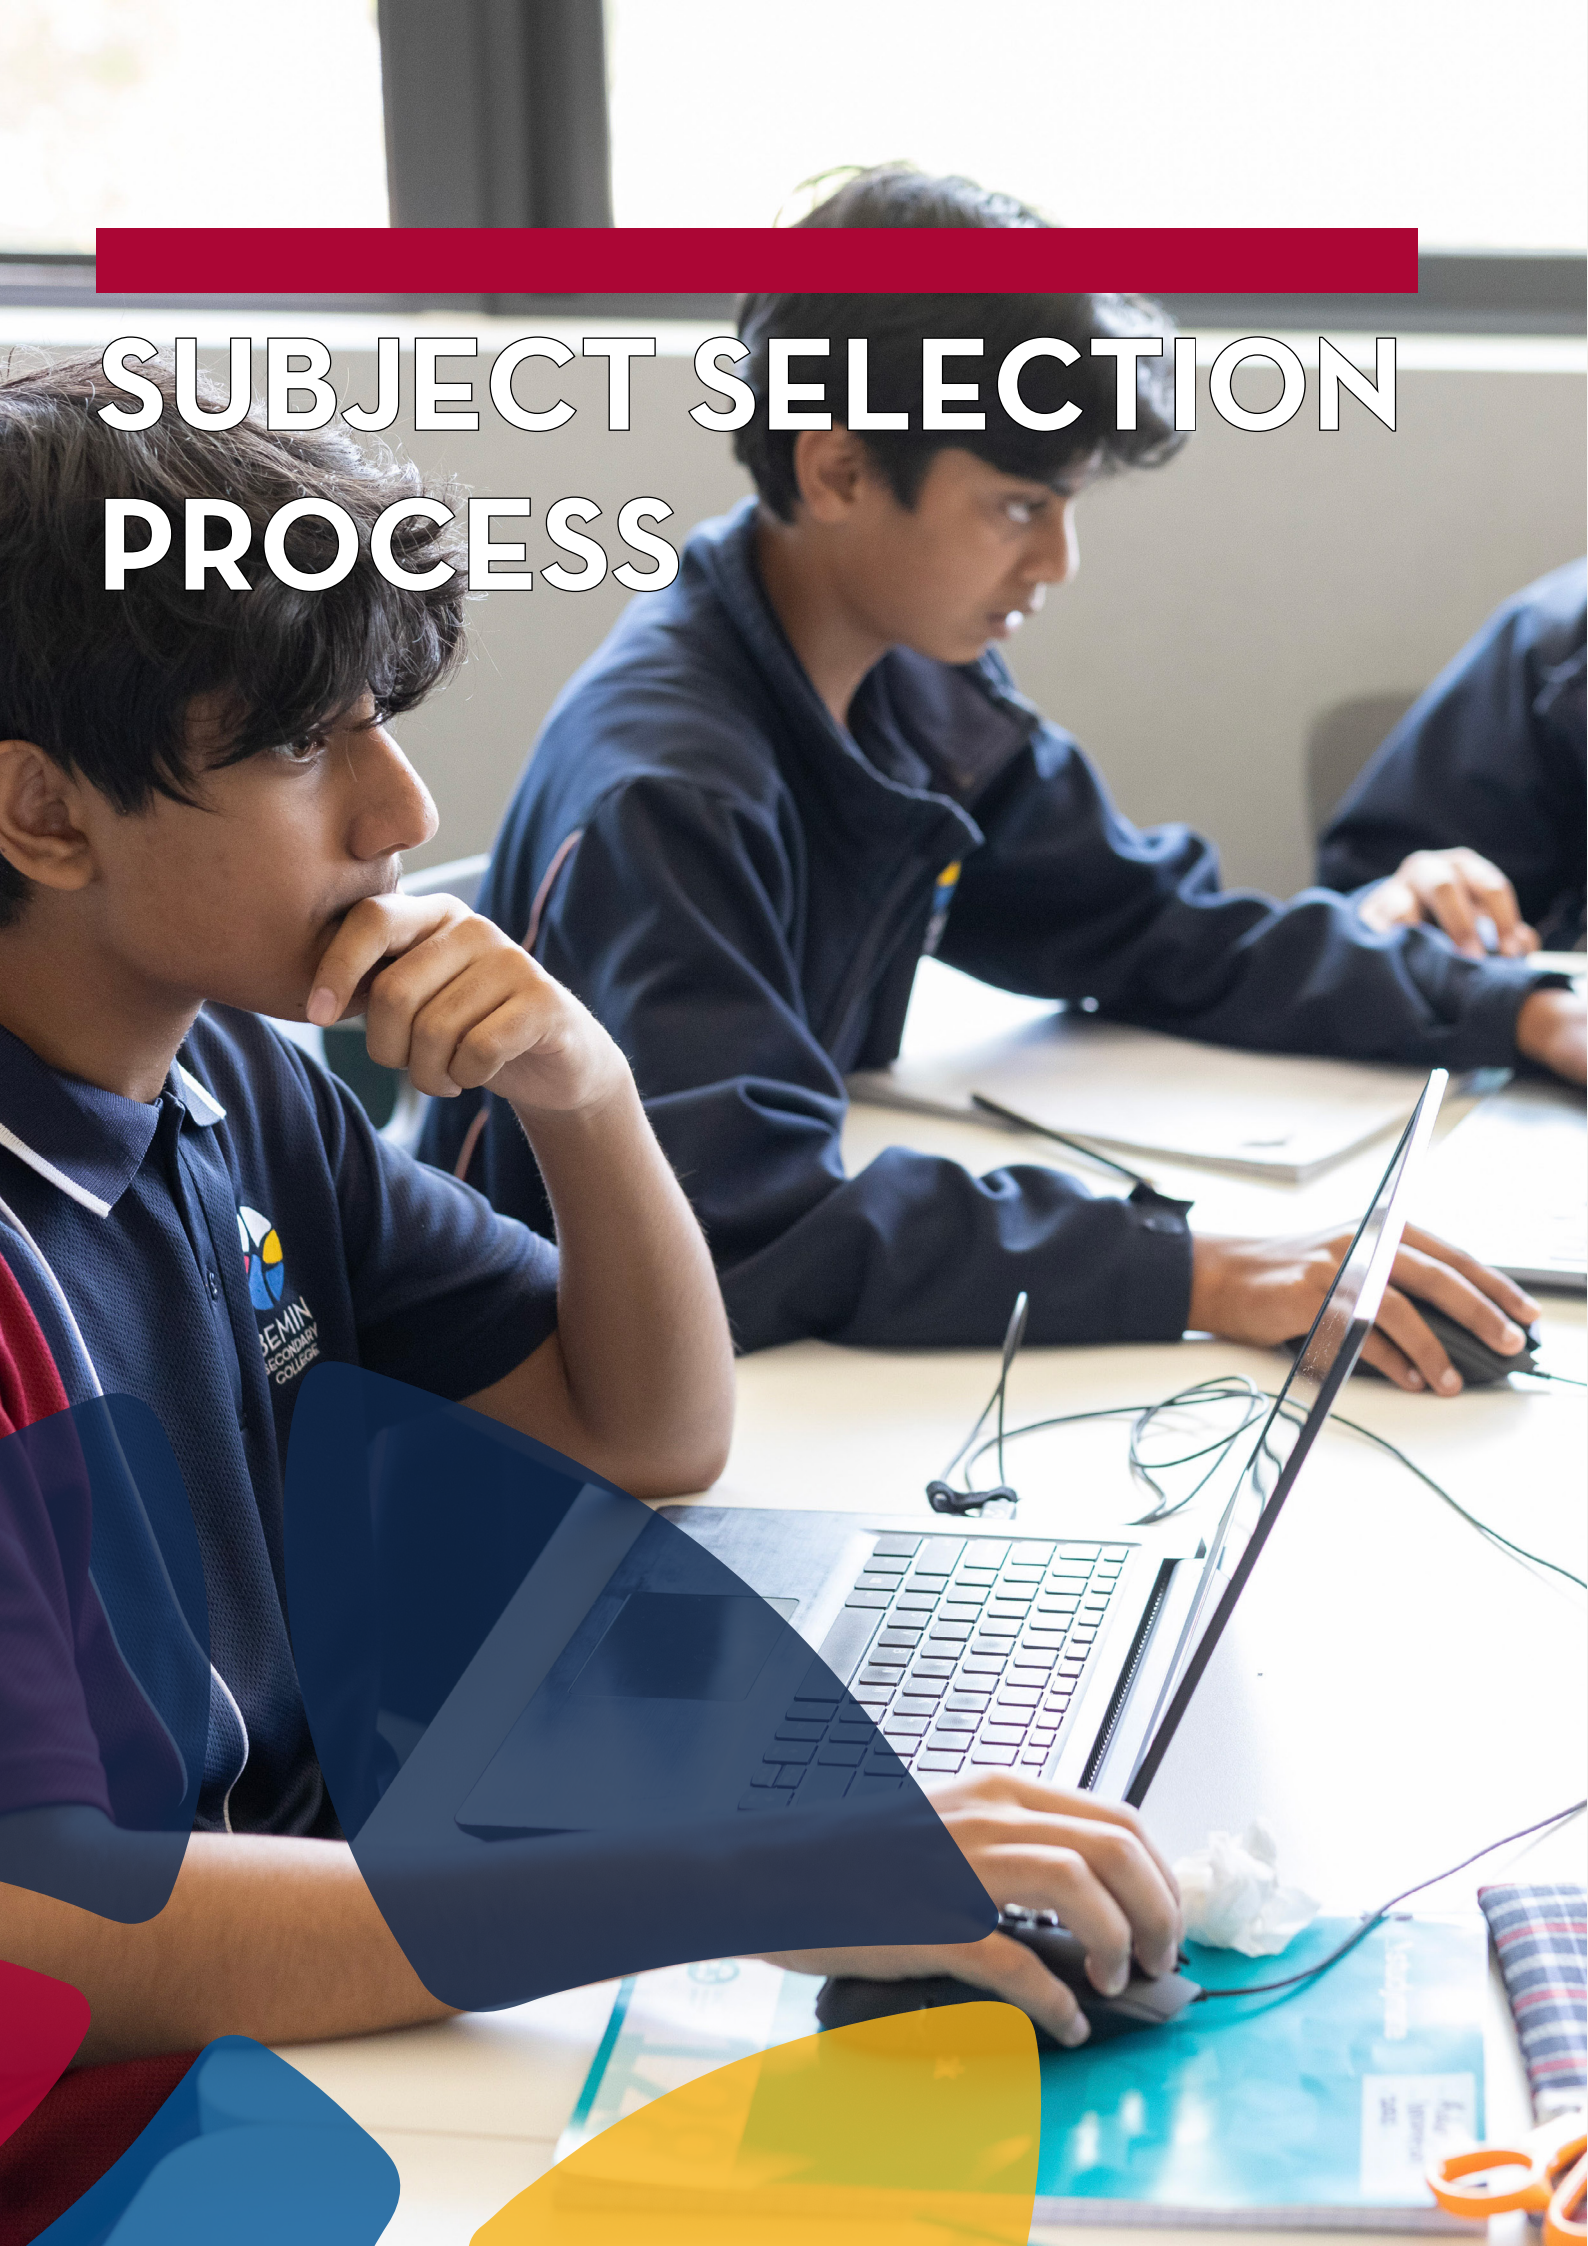

This subject provides a strong foundation for senior school studies in:

- VCE: Mathematical Methods, Specialist Mathematics, General Mathematics
- Vocational Major (VM): Applied Learning projects with a numeracy or enterprise focus
- VET Studies: Information and Communications Technology, Engineering Studies, Business

Career Pathways

It also develops transferable skills valuable for future career pathways in areas such as:

- Engineering and data science
- Finance, accounting, and economics
- Architecture and design
- Research, technology, and innovation industries

A photograph of two male students in a classroom. The student in the foreground is wearing a dark blue polo shirt with a logo that says 'SEMIN SECONDARY COLLEGE'. He is looking at a laptop screen with his hand on his chin, appearing thoughtful. The student in the background is also wearing a dark blue shirt and is looking at a laptop. The classroom has large windows in the background. There are decorative blue and yellow shapes in the bottom left corner of the page.

SUBJECT SELECTION PROCESS

APPLYING FOR SUBJECTS

Subject selections for Year 9 will be entered online through Timetable Choice at:

<https://my.edval.education/>

Step 1: Get your WebCode

- Your WebCode is unique to you.
- It will be provided by your current school's Leadership Team.
- Keep it safe - you'll need it to log in.

Step 2: Log in to *Timetable Choice*

- Go to <https://my.edval.education/>
- Enter your WebCode to access your subject selection page.

Step 3: Select your electives

- You **must select ONE (1) Arts-based elective** (e.g. Visual Arts, Media, Drama, Music).
- You **must select ONE (1) Technology-based elective** (e.g. Wood, Food, Textiles, Digital Technology).
- You can then select **TWO (2) further electives** from any subject area.
- You will be prompted to include backup preferences.

Step 4: Check and submit

- Review your selections carefully before submitting
- Once submitted, your choices will be sent to the school for processing.

Important: Late or incomplete selections may mean you miss out on your preferred electives, so make sure you complete your selections before the due date.
